TABLE OF CONTENTS

4 SINGLE-LINER STENCILS

Single-liner media blast stencil products ranging from medium to high tack with a variety of thickness and punch patterns to fit any sign and monument blasting need.

5 DOUBLE-LINER STENCILS

Anchor Gold™ double-liner rubber stencil offers an easy-to-recognize gold liner poly film between adhesive and rubber.

5 STENCIL FILLERS

Solvent-based and emulsion-based fillers for enhancing bond on any medium- or high-tack media blast stencil.

6 STENCIL GUIDELINES & PUNCHES

Photo guide for punch patterns plus tips and recommendations for the best results while using Anchor Stencil.

7 COMPLEMENTARY PRODUCTS

Masking tapes, flatback tapes, duct/cloth tapes, carton sealing tapes, double-coated tapes, polyethylene tapes, water-activated tapes, spray adhesive

ANCHOR SINGLE-LINER STENCIL

Anchor single-liner stencil provides a versatile range of options tailored for your memorial, mausoleum, and columbarium sandblasting needs. Introducing the new 113 series, the latest addition to our monument stencil collection, suitable for hand cutting, friction feeding, and slot and track-fed plotters. For maximum depth etching, our Anchor 111 features the thickest rubber backing and is designed for hand cutting, minimizing wear on cutting dies. For signage stencil applications and scenarios demanding higher bond strength, we offer a variety of single-liner stencils with an aggressive acrylic adhesive, ensuring additional strength and security

STENCIL FILLERS

Filler is formulated to work with the stencil adhesive to create a better bond to the substrate during media blast. The extra bond protects the small intricate designs and helps them stay attached to the substrate and not lift when high pressure is used. Anchor offers two types of filler: for high tack, hand cut products, #211; and for medium tack, machine cut products, #223.

STYLE	DESCRIPTION
#211	A high tack adhesive designed for use with stencil 111; on polished surfaces it is recommended that a light coat be applied; for best results on frosted, axed or steeled surfaces, apply two coats.
#223	A medium tack adhesive designed for use with stencil 129Y, 790Y, 790YS, 790YT and 791YT; on polished surfaces it is recommended that a light coat be applied; for best results on frosted, axed or steeled surfaces, apply two coats.
#333	A latex based filler that can be water-washable designed for use with medium tack media blast stencil; CAUTION: Do not let the product freeze.

CAUTION: Products contain toluene and heptane which are flammable. Use proper work hygienic practices to minimize exposure to liquids, vapors and fumes. Refer to product MSDS for additional health and safety information.

MEDIA BLAST STENCIL GUIDELINES

IPG® is Committed to Providing Superior Products that Offer:

- A flexible product line designed for use by hand, machine or computer-cutting applications
 - Excellent shape carving ability for precise detailing on even the most intricate designs
 - Superior blast resistance prevents burning under the most intense blasting
 - Cleaner transfer of artwork to stencil and easy-release liner increase efficiency in the production process
 - Easier cutting translates into less wear on knives and cutting dies; increases durability and requires fewer replacements
 - Stencil construction provides for smooth and accurate tracking through cutting machine; minimizes waste and lost production time
 - Product styles available in a variety of widths and lengths to fit all computer cutters; expanded roll size maximizes unattended cutting time
-
- High-tack stencils are designed for use on raw substrates. DO NOT USE on pre-treated or glass surfaces.
 - High-tack stencils have a water-based acrylic adhesive designed for bonding to rough surfaces
 - Medium-tack stencils have a petroleum-based adhesive designed for bonding to smooth surfaces
 - Medium-tack stencils are designed for use on primed or pre-painted substrates, glass, synthetic stone, ceramic tile and plastic
 - Always use a 60° blade when cutting stencils with plotters
 - Double-liner stencils have an extra liner layer to help hold the centers of letters/designs while transferring from computer to substrate

PUNCHES

COMPLEMENTARY PRODUCTS

MASKING TAPE

IPG® masking tapes are designed for superior performance in a variety of applications such as paint masking, holding, light-duty, splicing, bundling, packaging and many more.
Suggested: PT14, PT8, 513

CARTON SEALING TAPE

IPG's HOT MELT carton sealing tapes feature superior adhesion properties, holding force, tensile strength and easy unwind ensure consistent, reliable seals to a variety of corrugated and linerboard boxes.
Suggested: 7100, 6100

FLATBACK TAPE

IPG's flatback tapes are designed for a variety of packaging, splicing and tabbing applications, providing a quick, positive seal under a wide range of temperature and humidity conditions.
Suggested: 534, 582

DOUBLE-COATED TAPE

IPG double-coated tapes feature an extremely aggressive tack. Ideal for many industrial uses such as mounting, adhering and bonding applications.
Suggested: ATA200, ATA400, AFT200, AFT450, SGAFT450

DUCT/CLOTH TAPE

IPG offers a full range of cloth tapes to satisfy even the most demanding requirements and industry standards.
Suggested: AC50, AC20

POLYETHYLENE TAPE

IPG's polyethylene tape is manufactured to be durable and to withstand the most demanding conditions. Common applications include seaming, sealing & splicing, surface protection, vapor barrier, preservation and more.
Suggested: PE34, PE35, PE7, PE8, PE9

WATER-ACTIVATED TAPE

Water-activated tape bonds instantly to both virgin and recycled fiber surfaces and therefore, generates an immediate destructive bond resulting in a tamper evident package.
Suggested: 260, 280, 285

AC50 SPRAY ADHESIVE

Designed to assist bonding to several surfaces, which include wood, concrete and sheet metal. Contains no methyl chloride or CFCs; 41 PSI shear strength.

CORPORATE PROFILE

Headquartered in Sarasota, Florida, IPG is a global provider of packaging and protective solutions across a diversified set of geographies and end-markets. The Company develops, manufactures, and sells a variety of solutions including paper and film-based pressure-sensitive and water-activated tapes, stretch and shrink films, protective packaging, woven and non-woven products and packaging machinery.
