ANTI-CORROSION

## VCI EMITTER PACKS

### FLEXIBLE PACKAGING

Each VCI Emitter Pack contains Vapor Corrosion Inhibitor (VCI) pellets which protect ferrous and non-ferrous metals against corrosion, oxidation, tarnish and discoloration.

The packs provide an extremely efficient method for the dry preservation of metal parts within an enclosed space. The VCI vaporizes and then adsorbs on all metal surfaces, reaching even the most difficult recesses and interior voids.
