ANTI-CORROSION

VCI SHRINK FILM

FLEXIBLE PACKAGING

VCI Shrink Film is made with three layers of the latest polymer technology, providing maximum strength, flexibility and puncture resistance needed in aggressive shrink application. Our films are impregnated in low temperature with vapor corrosion inhibitors (VCI's) to protect ferrous and most non-ferrous metals from corrosion.

The slow release vapor action protects the exterior as well as hard-to-reach interior surfaces. It is self-healing and will provide 24 months of long-term protection for storage and shipments.

FEATURES & BENEFITS

- Film is transparent for ease of product identification
- Provides up to 24 months of continuous protection
- Metals protected: Carbon steel, stainless steel, copper, brass, aluminum, silver, galvanized steel
