PAPERSPACE™

PAPER SYSTEMS

X-PAD™

PATENTED TECHNOLOGY DRIVING UNMATCHED PERFORMANCE.

The X-Pad™ Paper Cushioning System has a revolutionary small footprint and rapid throughput. It is ergonomically designed to easily adjust the angle of the paper output.
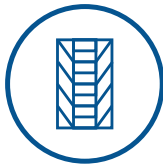

The X-Pad comes in two highly productive configurations: a floor model and a table model. Both can be used with various paper basis weights, one ply and two ply. The table side stand has a unique design that maximizes workstation space.

FEATURES & BENEFITS

Anti-jamming paper output and easy-to-load paper bundles increase uptime

Center stitching keeps the pads from unfolding

Rapid throughput speed of 180ft/minute

Digital interface shows variable speed selections for adaptable workstations

Fanfold paper stacks and feeds much faster then rolls

Paper is 100% recycled and 100% recyclable

888-898-7834 | itape.com

ipg®

Ready-Load™ speeds paper feed, splicing reduces changeovers, and both increase productivity

Digital touch screen for simple mode selection

Extra large foot pedal for hands free and safe operation
