BT100 BLAST IMPACT TAPE

- For protective masking of surfaces during dry paint stripping process
- Provides instant adhesion to clean/dry surfaces with little to no hot glue required on edges to prevent media intrusion
- Flexible, resists cracking, and lifting
- Conforms to irregular/curved surfaces
- Clean removal after blasting
- Tears easily by hand and can be cut for a precise fit with a knife
- Prevents small particles of blast media and other foreign debris from infiltrating and damaging sensitive surfaces, components and control systems
