DATA COLLECTION WITH IPG CENTRAL HUB

Knowledge is power. When combined with the ETX tape head, IPG's iTrack™ System monitors and reports data to improve your equipment's efficiency. This versatile, adaptive system is easy to set up and works with almost all case sealing equipment. iTrack operates within its own network, while remote cellular connectivity allows users to review performance data from anywhere.

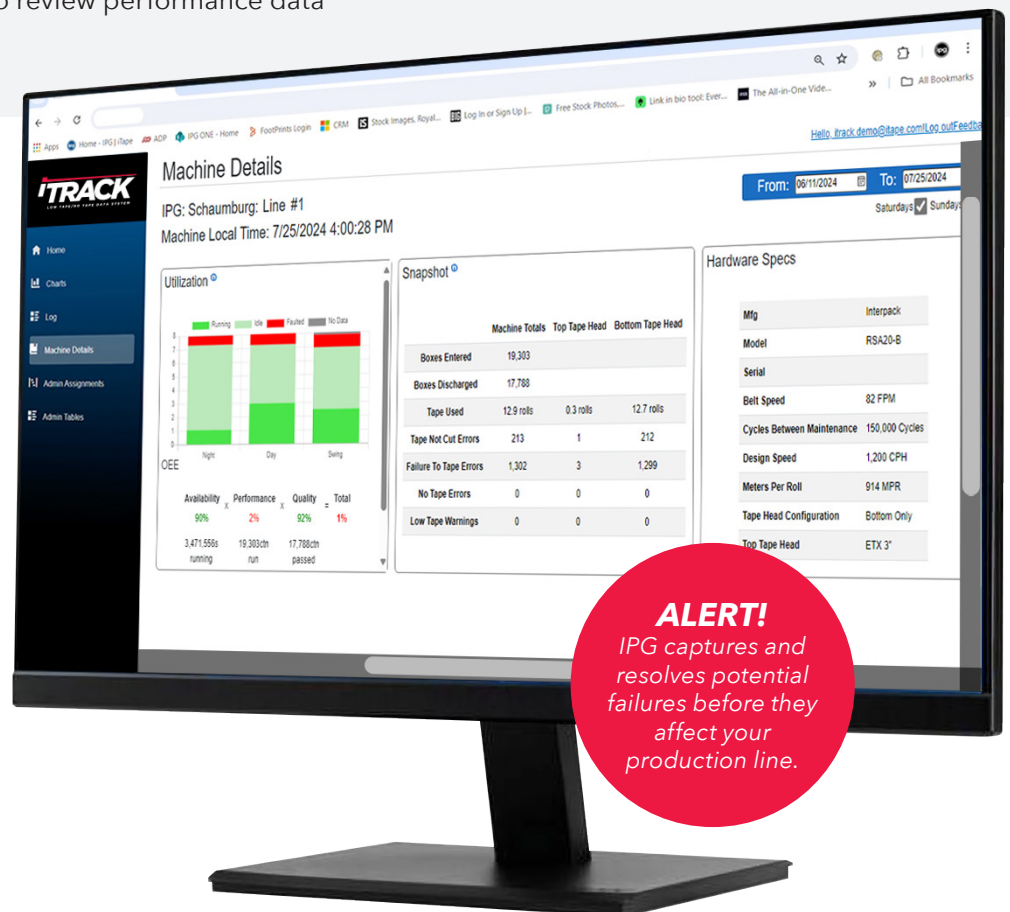

Reduces downtime through web-accessible data resulting in actionable course corrections

IPG Central Hub maximizes uptime through text and email alerts

Optimizes maintenance schedules
