

DAMAGE CONTROL.

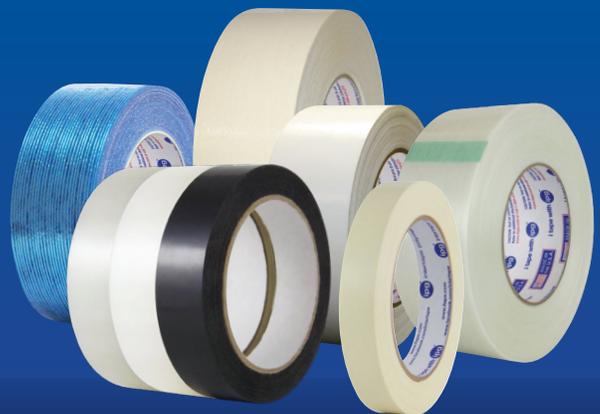

IPG®'s filament and tensilized polypropylene tapes offer appliance manufacturers a wide variety of solutions for these applications:

Holding — Clean removal adhesive solutions for securing parts, holding components and protecting surfaces. Our solutions provide the security you need to prevent damages during shipping and offer residue-free removal to prevent costly service calls.

Basiloid/Transport — Our RG89 and RP3 provide the strength needed to package and ship large appliances where the carton lift flap must support the weight of the appliance.

Hole Covering — IPG offers tensilized polypropylene tape solutions for hole covering, to assist in preventing foam from leaking during the insulation process.

Your state-of-the-art manufacturing processes ensure a quality appliance. Maintain the integrity of your products from manufacturing to installation with filament tapes from IPG.
