PACKAGING

+ PACKAGING PIONEERS

IPG brands **Central®** and **Better Packages®** helped pioneer **water-activated tape (WAT)** and dispensers since 1917. WAT creates a superior seal on corrugated cartons with advantages that industry leaders companies rely on, including strength, security, and a professional appearance.

PACKAGING DIAGNOSTICS

Packaging diagnostics provide the visibility and insight needed to keep packaging lines **performing at peak levels**. By making packaging performance measurable, diagnostics help manufacturers and distributors identify inefficiencies, predict failures, and **take corrective action** before problems escalate.
