RANDOM SEMI-AUTOMATIC CASE SEALER

Interpack's RSA Series Case Sealers are heavy duty operator fed machines that automatically adjust for each size case processed. This new case sealer was designed to offer faster processing speeds with improved pneumatics which allows for faster bridge rise and smoother descent onto the top of the case.

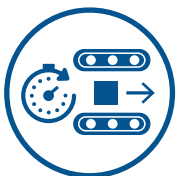

This premium drive style captures the case between four moving belts located above and below the case. Maximum stability is achieved by applying force to the strongest areas of the case. Top and bottom belt drives process the widest variety of case dimensions, although certain narrow widths may be better suited on side drive belts.

Featured with the newly designed Interpack RSA case sealer is the next generation ET Xtreme™ tape head housing patented technology.

ET Xtreme™ Tape Head

MACHINE FEATURES & BENEFITS

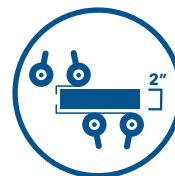

Rapid throughput speeds with belts running at 121 ft/min

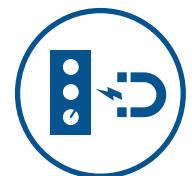

1/3 & 1/4 HP gear motors allow processing up to 85 lb cases

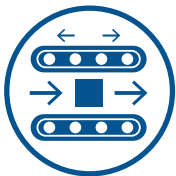

Best drive selection for light-weight, unstable, and void filled cases

Offset taping heads permit processing cases as low as 2" tall

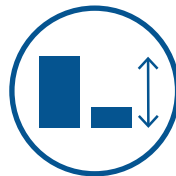

Magnetic operator control box can be moved to any location

Self tensioning, self tracking belt drive simplifies belt replacement

Secondary E-Stop button

Automatically adjusts for widest variety of cases

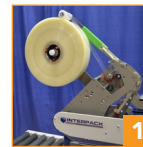

Upper head locks to clear jams and replace tape

Pneumatic infeed gate assures proper positioning of the case
