

tapes that get the JOB DONE

PG21 MASKING TAPE

Painting, high temperature painting, surface preparation, and coating

- Clean removal
- High temperature resistance
- Performs well in wet strip applications
- Resists paint flaking

PT7/PT14 MASKING TAPE

Painting, livery, surface preparation, and coating

- 7 & 14 day UV-resistance
- Superior paint lines
- Conformability and tear strength

OM MASKING TAPE

Painting, interior finishing, and surface preparation

- High Temperature resistance
- Resists bleed through
- Clean removal
- Sharp color separation on curves or straight lines
- Holds masking paper or films

AM MASKING TAPE

Painting, livery, interior finishing, and surface preparation

- Better bonding to itself for improved painting process performance
- UV resistant up to 3 days
- Resists paint flaking and wet sanding
- Works with both solvent and waterborne paints
- Clean removal

MM MASKING TAPE

Painting, surface preparation, and interior finishing

- Clean removal
- Excellent wet sanding properties
- Low profile light green backing for superior visibility of masked areas
- Heightened bonding to backing for increased shingling performance

513 MASKING TAPE

Used in lamination, surface prep, general utility and bundling

- Beige crepe paper masking
- Aggressive natural rubber adhesive
- For all-purpose or non-critical applications

PG48 MASKING TAPE

High temp painting, painting, powder coating, surface preparation and wet stripping

- Protect and preserve surfaces at 325°F for short periods of time
- High temperature resistant pressure-sensitive adhesive
- Perfect for coating processes
- Fine crepe paper backing

HAND MASKING FILM

Painting, livery, surface protection, floor protection, and coating

- Stain resistant
- Temperature resistant
- Static treated HDPE film
- Clings to surfaces for surface protection
- Bleed through resistance
- Resists paint flaking

PES-POLYETHYLENE TAPE

Surface protection, floor protection, interior finishing, and painting protection

- 30 days UV resistant
- Moisture resistant
- Clean removal
- Tested in accordance with UL723 / ASTM E84

SSPH PRE-MASK SURFACE PROTECTION

Surface protection, floor protection, interior finishing, and inspection protection

- High tack
- Applied to high foot traffic areas
- Wrinkle resistant
- Clean removal from common surfaces

AC36/AC20 DUCT TAPE

Belly tape, inspection tape, attachment, surface protection, floor protection, and temporary repairs

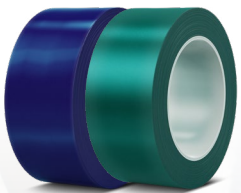

- AC36 - 11 mil medium grade
- AC20 - 9 mil general utility grade
- Polyethylene coated cloth tape
- Aggressive natural rubber adhesive

602 ELECTRICAL TAPE

Attachment, interior finishing, surface repair and correction

- Has soft 'plasticized' stabilized PVC film coated with a non-corrosive rubber based adhesive
- Resistant to water, oils, acids, alkalis, and other corrosive chemicals
- UL-listed

6120/6215 MASKING TAPE

Painting, surface preparation, and coating

- Silicone adhesive
- Designed for powder coatings and composite bondings
- PET backing provides flexibility/conformability, solvent resistance, and chemical resistance
- Removes without leaving residue
- Precision cut for tear resistance and clean, crisp paint lines

BT100 MEDIA BLAST IMPACT TAPE

Sand blasting, hydro blasting, shot peening, surface protection, surface repair and correction, and metal fabrication

- Provides instant adhesion to clean/dry surfaces
- Flexible, resists cracking and lifting
- Clean, one-piece removal after blasting
- Tears easily by hand and can be cut for precise fit
- Prevents small particles of blast media and foreign debris from damaging sensitive surfaces

ALF300 FOIL TAPE

Lamination, interior finishing, attachment, surface repair and correction

- Water-resistant adhesion
- 3 mil dead soft aluminum alloy with acrylic adhesive
- Instant, water-resistant adhesion to clean, dry surfaces
- Adheres well to itself when overlapped yet dispenses from roll easily
- Conforms to irregular/curved surfaces
- Flexible and resists cracking and lifting
- UV resistant
- Proprietary converting to minimize roll slivering and hand cuts

ALF201UL FOIL TAPE

Lamination, interior finishing, attachment, surface repair and correction

- Engineered to meet UL181A-P and UL181B-FX
- Long-lasting adhesive to clean/dry surfaces
- Flame retardant
- UV & Mold Resistant
- High shear adhesion
- Superior bonding when exposed to sub-zero or elevated temperatures

PE FOAM DOUBLE-COATED TAPES

Bond and mounting, attachment, interior finishing, and lamination

- Cross-linked high density polyethylene, closed cell foam coated on both sides with permanent bonding rubber and acrylic adhesive
- Permanent bond to a variety of irregular surfaces

ACRYLIC FOAM DOUBLE-COATED TAPES

Mounting and bonding with appliances, electronic devices, signage, graphics, side molding, emblems, and weather stripping

- Excellent resistance to solvents and temperature variances
- High flexibility
- Unique shock absorption and vibration dampening properties
- Eliminates the need for many mechanical fasteners depending upon the application
- Intended for permanent application

TPP200 FLANGE PROTECTION TAPE

Flange protection, surface protection, metal fabrication, coating, and surface preparation

- Stain/residue free removal from painted metals, stainless steel, ABS plastic and other common appliance surfaces
- Designed for surface protection
