

PAPER SYSTEMS

X-FILL™/X-FILL™ PRO WMS

AUTOMATED PAPER DISPENSING – POWERED BY YOUR WMS

Unlock smarter, faster, and perfectly calibrated void fill. Our intelligent paper dispensing system integrates directly with your Warehouse Management System (WMS) to deliver the exact amount of protective paper needed—automatically, every time. When an operator scans a product label, the system instantly pulls product dimensions, box size, and required protective volume from your WMS. It then dispenses the precise amount of paper needed to secure the item in transit. No guesswork, no waste, no slowdowns.

FEATURES & BENEFITS

Dispenses the right amount of paper based on real time WMS data

Faster throughput, with no manual measuring or estimating

Eliminates over-stuffing and reduces paper consumption

Ensures every shipment meets your packaging standards

Works with leading WMS platforms for smooth deployment

SPECIFICATIONS

	X-FILL	X-FILL PRO
Part #	SL097-WMS	SL098-WMS
Description	Control Box with WMS Port	Control Box with WMS Port

*Part number is for control box only. Need to order X-Fill configuration separately.
