

your challenges, our solutions.

Durabubble^{RP} • Real performance bubble offering the ultimate in protection in standard and anti-static rolls

Durabubble^{VL} • Value line bubble offering strong protection in standard rolls

E-Z Seal Pouches • Save on labor and material

Polyair Emerald • 25% PCR green tint bubble provides high quality protection at an economical price

Handi-Pak • Durabubble dispenser

Endurabubble • Triweb, superior strength, puncture resistance

Durabond • Cohesive - bonds to itself, not to the product

Duramask • Adhesive - bonds to products of any shape

Durakraft • Moisture and cushioning protection

Fascia Bags • Automotive grade fascia protection

Metalized Bubble • Insulative packaging

BUBBLE

With its unique structure and remarkable burst strength, Durabubble provides outstanding cushioning and protection. Whether wrapping fine china or furniture, Durabubble is the ideal solution for cushioning, void filling and surface protection. Durabubble gives you the confidence that your products will be protected regardless of the conditions.

MAILERS

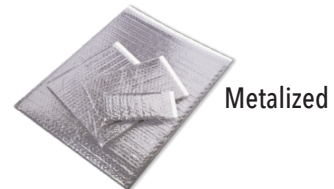

Meeting and exceeding the needs of the growing e-business, retail and fulfillment networks, IPG's diverse line of mailers provide easy-to-use and cost-effective alternatives to boxes and other containers. Each mailer is durable and lightweight, stocked at our facilities and can be custom printed. Mailers provide protection and security while lowering shipping costs.

Ecolite • Kraft bubble mailer - stocked in golden kraft. For white kraft paper please contact your local IPG representative for availability

XPAK • Polyethylene bubble mailer - light and tough: the ultimate mailer

Fastpak • Polyethylene courier mailer - superior performance for non-fragile items

Metalized • Metalized bubble mailer - insulative packaging

Starfoam • Standard and custom densities, including static dissipative from 1/32" to 1/4"

Starbond • Cohesive - bonds to itself, not to the product

Starmask • Adhesive - bonds to products of any shape

Lamifoam • High-performance laminated poly - rolls and pouches

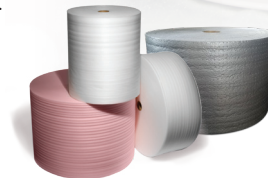

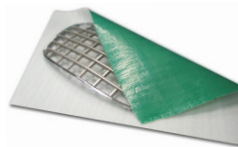

Vented • Allows products to breathe and vent

Ridged • Ideal for interleaving, wrapping and cushioning

Pouching & Sheeting • Standard and custom sizes available to meet any protective need

FOAM

Advanced manufacturing technology makes Starfoam and Lamifoam highly resistant to punctures, tears and impact. Made from low density polyethylene, Starfoam provides excellent surface protection and cushioning for anything from sporting goods to auto parts.

PAPER SYSTEMS

Why choose protective packaging paper for your company's void fill and product protection? It's versatile, cost-effective, easy-to-use, and eco-friendly. PaperSpace Paper Systems feature patented paper packaging technology, driving unmatched performance. Rapid throughput speeds, anti-jamming technology, and easy loading improve pack station uptime. Plus, PaperSpace void fill material is curbside recyclable!

PaperSpace Coreless e+ • Simple, versatile paper dunnage solution featuring easy-to-handle paper rolls without the central cardboard core

PaperSpace X-Fill • Delivers high throughput speeds with low maintenance and downtime. Available in floor stand or tabletop configurations.

PaperSpace X-Fill MM • Mobile manual paper dispenser is perfect for handling small volume void fill needs.

PaperSpace X-Fill MT • Tabletop manual paper dispenser is perfect for handling small volume void fill needs.

PaperSpace X-Fill Pro • Designed for high-volume void fill applications with a speed of 415'/minute.

PaperSpace X-Pad • Paper cushioning system has a revolutionary small footprint and rapid throughput. Available in floor stand or tabletop configurations.

PaperSpace Curby Fragile Wrap • Machines dispense honeycomb paper for the protection of sensitive and fragile products.

PaperSpace Fanfold Paper • Paper is 100% recycled, 100% recyclable, converted in the USA, available in a variety of sizes and weights, and printable.

AirSpace A3 Pro • A one touch operation air pillow and bubble-on-demand void fill system - no air and temperature adjustments are needed

AirSpace G4 • Produces pillows in various sizes and film thicknesses to provide versatility needed in today's marketplace

AirSpace G6 • Small footprint machine produces air pillows and bubble film for even the most demanding environments

AirSpace BOD Winder • Designed for coiling 12 or 24-inch-wide inflatable protective packaging

AirSpace Film • High quality air pillow film for use on IPG Inflatable Void Fill Systems. Available in a variety of sizes and thicknesses. Custom tintable and one-color printable.

INFLATABLE SYSTEMS

AirSpace G-Series machines provide protective packaging solutions for low- to high-volume E-Commerce packaging operations with a small footprint and light weight for portability. AirSpace air pillows can be color tinted and custom printed for branding profile alignment.

VCI

VCI-2000™ flexible packaging is made with the latest polymer technology and impregnated in low temperature with vapor corrosion inhibitors (VCI's) to protect ferrous and most non-ferrous metals from corrosion.

Gusseted Bags • Superior strength, ideal for protecting complete pallets, bins and racks

Heat Seal Bags • Designed for packaging small and medium size parts

Sheeting • Used as bottom pallet sheet/layer divider to protect ferrous and non-ferrous metals

Shrink Bags & Films • High strength polymers impregnated with VCI's, ideal for shrink ovens/tunnels to automate packaging process

Zipper Bags • Resealable bags for packaging of small and medium parts

Bubble Film & Bags • Protect high precision metal finishes from marring, scratching and corrosion while in transit or storage

Stretch Film • Ideal for keeping odd-shaped or large metal parts secure and corrosion free during shipment

Paper Wrap • Enables effective and long-term protection of metals in the most probable adverse conditions
