

DID YOU KNOW?

SHRINK FILM

IPG'S EXLFILM® BENEFITS

Technological advancements in resin formulation and film extrusion have led to the development of Exfilmplus® GPS and Exfilmplus® GPL polyolefin shrink films. These state of the art films demonstrate:

- Enhanced sealing and shrinking performance
- Packaging efficiency
- Potential to utilize a thinner gauge film
- Cost saving opportunities
- Overall source reduction

WHICH FILM IS RIGHT FOR YOU?

Exfilmplus® GPL GLOBAL PERFORMANCE LITE SHRINK FILM

- Thin gauge films
 - Available in 35, 42 and 55 gauge
- High percentage of shrink
- Lighter shrink force
- Lower temperature operation
- Source reduction
- For smaller, lighter packages

Exfilmplus® GPS GLOBAL PERFORMANCE SHRINK FILM

- Traditional or standard gauge films
 - Available in 45, 60, 75, 100 and 125 gauge
- Superior strength
- Excellent seals
- Outstanding optical properties
- For larger and heavier packs

THINGS TO CONSIDER

There are many considerations when choosing a film to best wrap a package. The film formulation and gauge selection is dependent upon:

- Product weight and size
- Equipment utilized for wrapping
- Master carton packaging
- Shipping
- Storage
- Retail shelf display

Contact your local Exfilm® Distributor who has the technical expertise to assist in selecting the Exfilm product which best suits your packaging requirements and goals. Together with the experts at IPG, you can be assured that you will be using the Exfilm® product which is specifically suited to your application and delivers the overall best value.

WHY?

- Exfilmplus® films are crosslinked.
- The “plus” indicates a stronger film capable of working on a wide variety of equipment and sealing systems.
- Exfilmplus® shrink films is one of the toughest and most versatile on the market.
- Our films have greater windows of seal and shrink performance at a broader range of temperatures.
